Education

Computer science FOSZK
University of Nyíregyháza

Sep 2019 – Jun 2021

Languages

English | Hungarian

Skills

JavaScript, TypeScript, Angular, React, Next.js, Vue, Node.js, C#, MySQL, PostgreSQL, HTML, CSS, SCSS/SASS, Tailwind, Docker, Jest, Cypress, AWS, Git

Experience

DPC Consulting (contracted through Forweb)

Mar 2022 – present

Front-end developer

Contributing to **GE HealthCare's cloud-based Identity and Access Management** software.

- Developing new features and UI components with Angular 18 to improve functionality and usability.
- Identifying and resolving bugs to ensure smooth application performance.
- Writing and maintaining unit tests (Jest) and integration tests (Cypress) to ensure high code quality.
- Conducting code reviews to enforce best practices and maintain clean, efficient code.
- Collaborating closely with the design team to align UI/UX improvements with business requirements.
- Delivering feature demonstrations to internal client teams, showcasing updates and enhancements.

Forweb

Feb 2021 – Mar 2022

Full-stack developer

Worked on developing and optimizing e-commerce platforms.

- Built and maintained e-commerce websites using PHP (Yii 2 framework).
- Integrated payment gateways (SimplePay, Barion) for secure online transactions.
- Optimized and refactored existing codebases to improve maintainability and performance.

Projects
